

ARTERIAL BLOOD GAS COLLECTION

Name:	Job Number:	Rating: 		
Unit:	Job Title:			
Contract Date:				
Evaluation Key: M- Met NM- Not Met NA- Not Applicable		Method of Evaluation: Knowledge: Exam(Written/Oral) Skills: Demonstration/Discussion Attitude: Observation		
Rating Scale: Met: 90% - 100% Not Met: 89% & below and remedial once NA-(Not applicable) – entries to be deducted from the total score				
COMPETENCIES		EVALUATOR ASSESSMENT		
		M (1)	NM (0)	NA
I.	KNOWLEDGE			
1.	Verbalize the rationale for noting the percentage of oxygen administration and the core temperature (oral or rectal) prior to taking sample.			
2.	State the supplies needed for the route of collection identified and the preparation of the puncture site prior to taking the sample.			
3.	Discuss the application of the Allen's Test prior to taking a radial sample			
4.	Verbalize the aftercare required both arterial line and puncture sampling e.g. applying pressure on the site for at least 5 minutes post sample collection.			
5.	Discuss the preparation of the arterial line for taking a sample e.g. removal of 5-10 ml depending on length of tubing.			
6.	State the procedure for transportation of the sample to either local machine or laboratory is 20 minutes or more.			
7.	Discuss the risk and complications associated with arterial puncture and use of arterial line e.g. tissue ischemia or necrosis, infection, hemorrhage and incidental intra-arterial drug injection.			
8.	State the role and responsibility of the nurse when the sample results are abnormal.			
II.	SKILLS			
1.	Demonstrate how to prepare for the taking of an arterial sample from either a puncture site or arterial line.			
2.	Complete the entire collection procedure of taking a sample according to the relevant route e.g. demonstrates Allen's test and completes the correct labeling procedure for the sample collected.			
3.	Demonstrate the aftercare required for both arterial line and puncture sampling e.g. apply pressure to puncture site for a minimum 5-10 minutes as appropriate to individual patient or flushing arterial line and 3 way stopcocks and closure of all portals.			
4.	Demonstrate appropriate action when results are abnormal including the documentation of the results and action taken.			
5.	Document the procedure and outcome in the patient's records.			
III.	ATTITUDE			
1.	Accept constrictive criticism as learning opportunity.			
2.	To be self-aware of limitation in knowledge and skills.			
3.	To be approachable and open to answer patient and family's questions.			
4.	Attentive to overall patient experience e.g. pain, anxiety and have ability to provide comfort and emotional support as needed.			
5.	Ability to organize and facilitate a Reflection session and on practice after an Arterial Blood Gas learning opportunity occurs and activate findings to improve future practice and response.			
Raw Score				

Formula: $\frac{\text{Raw Score} \times 100\%}{\text{Total Score}} =$ % Rating
