

PATIENT ASSESSMENT, REASSESSMENT AND VITAL SIGNS

Name:	Job Number:	Rating:		
Unit:	Job Title:			
Contract Date:				
Evaluation Key: M- Met NM- Not Met NA- Not Applicable		Method of Evaluation: Knowledge: Exam(Written/Oral) Skills: Demonstration/Discussion Attitude: Observation		
Rating Scale: Met: 90% - 100% Not Met: 89% & below and remedial once NA-(Not applicable) – entries to be deducted from the total score				
COMPETENCIES		EVALUATOR ASSESSMENT		
		M (1)	NM (0)	NA
I.	KNOWLEDGE			
1.	State the nurse's role and responsibility in completing a Comprehensive Patient Assessment, Reassessment and Vital Signs for a patient in area of practice and comparing findings with the patient's baseline findings are so important to overall assessment.	☐	☐	☐
2.	Verbalize the role and responsibilities of the nurse and the need to start the assessment with taking a full Health History, family history, psychosocial history and activities of daily living.	☐	☐	☐
3.	Discuss why assessment involves collecting both subjective and objective data of the presenting complaint.	☐	☐	☐
4.	Explain why observing the patient's body language during assessment is important.	☐	☐	☐
5.	State the PQRSTP model of exploring the chief complaint i.e. Proactive or palliative (provokes or relieves symptoms), quality or quantity (what does symptom/s feel, look or sound like), region or radiation (where is the symptom/s) severity of symptom/s including PAIN SCORE, timing (when was it sudden, how often and how long does symptom/s last), psychosocial history, (find out how the patient feels about himself, his place in society and his relationships with others).	☐	☐	☐
6.	Explain how to properly observe the patient using 'some teams' – symmetry (are face and body symmetrical?), old (do they look their age?), mentation (are they alert confused agitated or inattentive?), expression (do they appear ill, in pain or anxious?) trunk (are they thin, stocky, obese or barrel-chested?), extremities (are the fingers clubbed, are there joint abnormalities or edema?), appearance (are they clean and appropriately dressed?), movement (is their posture, gait and coordination normal, are they mobile and able to ambulate normally?), speech (is their speech relaxed, clear, strong, understandable and appropriate, do they sound stressed?).	☐	☐	☐
7.	Verbalize the standard for the frequency of measuring vital signs as per policy in area of practice.	☐	☐	☐
8.	Discuss the weight and height, temperature and pain score as vital signs and why these are important.	☐	☐	☐
9.	State how to assess the pulse noting rate, rhythm and strength and why these are important when considering the amount of blood ejected with each heartbeat.	☐	☐	☐
10.	Discuss the rationale for not using the thumb for taking a pulse or blood pressure.	☐	☐	☐
11.	Discuss the limitations of measuring oxygen saturation with pulse oximeter.	☐	☐	☐
12.	State when manual blood pressure readings and pulses are preferable to automated readings.	☐	☐	☐
13.	Explain and calculate the Mean Arterial Pressure (MAP) i.e. SBP +2 x DBP/3 and why this is important note.	☐	☐	☐
14.	Explore the observations and parameters for reporting significant findings and vital signs to nurse in charge and/or physician.	☐	☐	☐
15.	Discuss the need and how to document the patient's comprehensive assessment, reassessment and vital signs findings and at the time of completion.	☐	☐	☐
II.	SKILLS			
1.	Demonstrate how to complete a comprehensive patient assessment, reassessment and vital signs of a patient in area of practice and compare findings with the patient's baseline results and explain why this comparison data is so important to the overall assessment of the patient and the chief complaint.	☐	☐	☐

COMPETENCIES		EVALUATOR ASSESSMENT		
		M (1)	NM (0)	NA
2.	Complete an assessment on a patient with taking a full health history e.g. biographic data, chief complaint, medical history, family history, psychosocial history and activities of daily living.	☐	☐	☐
3.	Demonstrate the collecting of both subjective and objective data when completing an assessment.	☐	☐	☐
4.	List and demonstrate some examples of the patient's body language noted during the completion of an assessment and state what message/s the patient might have been communicating.	☐	☐	☐
5.	Demonstrate the use of the PQRST model of exploring the chief complaint i.e. proactive or palliative (provokes or relieves symptoms), quality or quantity (what does symptoms/s feel, look or sound like), region or radiation (where is the symptom/s) severity of symptom/s including PAIN SCORE, timing (when, was it sudden, how often and how does symptom/s last).	☐	☐	☐
6.	Complete an observation of a patient using 'some teams' – symmetry (are face and body symmetrical?), old (do they look their age?) mentation (are they alert, confused agitated or inattentive?), expression (do they appear ill, in pain or anxious?), trunk (are they thin, stocky, obese or barrel-chested?), extremities (are the fingers clubbed, are there joint abnormalities or edema?) appearance (are they clean and appropriately dressed?), movement (is their posture, gait and coordination normal, are they mobile and able to ambulate normally?) Speech (is their speech relaxed, clear, strong, understandable and appropriate, do they sound stressed?).	☐	☐	☐
7.	Complete the documentation for the frequency of measuring vital signs as per policy in area of practice.	☐	☐	☐
8.	Demonstrate taking the weight and height, temperature and pain score as vital signs.	☐	☐	☐
9.	Demonstrate how to assess the pulse noting rate, rhythm and strength and why these are important when considering the amount of blood ejected with each heartbeat.	☐	☐	☐
10.	Complete the measuring of oxygen saturation with pulse oximeter.	☐	☐	☐
11.	Complete both manual blood pressure readings and pulse and automated readings.	☐	☐	☐
12.	Demonstrate how to read and calculate the Mean Arterial Pressure (MAP).	☐	☐	☐
13.	Complete the documentation and reporting of significant findings and vital signs to nurse in charge and/or physician.	☐	☐	☐
14.	Complete the documentation of the patient's comprehensive assessment, reassessment and vital signs accurately.	☐	☐	☐
III.	ATTITUDE			
1.	Accept constructive criticism as learning opportunity/s.	☐	☐	☐
2.	To be self-aware of limitation in knowledge and skills.	☐	☐	☐
3.	To be approachable and open to answer patient and family's questions.	☐	☐	☐
4.	Deal with and manage patient information professionally with confidentiality and integrity.	☐	☐	☐
5.	Demonstrate ability to organize and facilitate a reflection session in and on practice after a learning opportunity occurs during the completion of a comprehensive assessment, reassessment and vital signs of patient needs and activate findings to improve future practice and response.	☐	☐	☐
	Raw Score			

Formula: $\frac{\text{Raw Score} \times 100\%}{\text{Total Score}} =$ % Rating
